EDUCATION

- **Bahria University** — **Karachi Campus**
  Undergraduate Software Engineer (3.28 CGPA) — *Expected Graduation, June 2027*
- **Bahria College** — **Karsaz NORE-4**
  Pre-Engineering (79.4%) — *(2021-2023)*
  Matriculation (94.5%) — *(2019-2021)*

PROFILE SUMMARY

Software Engineering student in the 6th semester at Bahria University with a strong focus on Software Quality Assurance. I have completed Manual Testing, API, and Database courses and am currently working as a QA Intern at Bits Collision, performing manual and API testing on web and mobile applications. My experience includes test case design, execution, defect reporting, API validation using Postman, and basic performance testing using JMeter. I also have hands-on experience with BrowserStack for cross-browser testing and am currently learning automation testing with Cypress. I aim to build strong expertise in both manual and automation testing while contributing effectively in a professional QA environment.

SKILLS

- **Testing Skills:**
  Manual Testing, Basic Automation (Cypress), API Testing, Performance Testing, Cross-Browser Testing, Test Case Design, Bug Reporting, SDLC/STLC
- **Programming & Database Skills:**
  JavaScript, Java, TypeScript, HTML, CSS, C#, MySQL
- **Tools & IDEs:**
  Postman, BrowserStack, JMeter, MySQL Workbench, Microsoft SQL Server, Visual Studio Code, Visual Studio, Eclipse IDE
- **Soft Skills:**
  Team Collaboration, Adaptability & Quick Learning, Effective Communication, Problem-Solving Skills

WORK EXPERIENCE

- **Bits Collision** – Karachi, Pakistan — Nov 2025 – Present
  QA INTERN
  - Conducted manual testing for the 1EO and Thaleen websites, identifying and reporting multiple functional defects.
  - Prepared bug reports for a Lead Management mobile application after independent testing.
  - Conducted manual API testing for the InstaKin website using Postman by validating request/response data and status codes.
- **Karachi Shipyard & Engineering Works (KSEW)** – Karachi, Pakistan — July 2025 – August 2025
  IFS ERP TRAINEE – INTERN
  - Worked as an intern in the IT Department with exposure to the IFS ERP system and basic enterprise IT operations.
  - Assisted in running basic database queries for data checking and system support tasks.
  - Gained practical insight into corporate IT environments, documentation standards, and professional work culture.

PROJECTS

- **Thaleen Website – Manual Testing**
  Conducted manual testing on the Thaleen website by executing test scenarios, identifying functional issues, and preparing detailed bug reports.
- **InstaKin Website – API Testing:**
  Conducted manual API testing for the InstaKin website by testing multiple APIs using Postman. Validated request and response data, status codes, and API functionality to ensure correct behavior. ***(Tool: Postman)***
- **Lead Management Application – Manual Testing:**
  Tested a Lead Management application by validating core features and workflows. Identified issues through manual testing and prepared structured bug reports based on test results.
- **1EO Website – Manual Testing:**
  Performed manual testing on the 1EO website by creating test scenarios and test cases, executing tests, and identifying multiple functional bugs. Prepared detailed bug reports to document issues and support fixes.

COURSES AND CERTIFICATIONS

- Software Manual Testing | API Testing with Postman | Introduction to JMeter
- QA Fundamentals (10Pearls University) | Introduction to Software Testing (Simplilearn)
